# Introduction to the Millennium Challenge Account

Established in 2004, the Millennium Challenge Account (MCA) is an innovative foreign assistance program designed to reduce poverty in developing countries through sustainable economic growth. As an independent U.S. Government agency, the Millennium Challenge Corporation (MCC) administers the MCA funds that are provided annually by Congress. MCC is managed by a Chief Executive Officer with oversight from a Board of Directors. The Board is composed of five public sector members—the Secretary of State, Secretary of the Treasury, U.S. Trade Representative, Administrator of the U.S. Agency for International Development, and MCC’s CEO—and four private sector members appointed by the President and confirmed by the U.S. Senate. MCC draws its diverse staff from various U.S. Government agencies, the private sector, universities, international development agencies, and non-governmental organizations.

Every year, the MCC Board of Directors meets to select countries as eligible to develop a proposal for MCA assistance (see box describing MCC’s assistance programs). Recognizing that development is achieved by a country’s own efforts, policies, and people, MCC’s assistance offers selected countries an opportunity to identify their own priorities for achieving sustainable economic growth and poverty reduction. Once

## Compact and Threshold Countries

An MCC Compact is a multi-year agreement between MCC and an eligible country to fund specific programs targeted at reducing poverty and stimulating economic growth. MCC has approved 19 Compacts worth nearly \$7 billion with Armenia, Benin, Burkina Faso, Cape Verde, El Salvador, Georgia, Ghana, Honduras, Lesotho, Madagascar, Mali, Mongolia, Morocco, Mozambique, Namibia, Nicaragua, Senegal, Tanzania and Vanuatu. MCC is working toward developing compacts with 7 countries: Colombia, Indonesia, Jordan, Malawi, Moldova, the Philippines and Zambia.

To provide a further incentive for policy reform, Congress also established the Threshold Program for countries that demonstrate a significant commitment to meeting the indicator criteria but fall short in a limited number of policy areas. Threshold assistance helps countries address specific areas of policy weakness identified in the MCA selection indicators. To date, MCC has signed Threshold agreements totaling nearly \$470 million with 19 countries: Albania, Burkina Faso, Guyana, Indonesia, Jordan, Kenya, Kyrgyz Republic, Malawi, Moldova, Niger, Paraguay, Peru, Philippines, Rwanda, Saõ Tomé and Príncipe, Tanzania, Uganda, Ukraine, and Zambia. MCC is working toward developing Threshold agreements with Liberia and Timor-Leste.

selected as eligible, a country undertakes the process of developing a proposal for funding in broad consultation with its own citizens. MCC teams work in partnership with eligible countries to refine their Compact proposals in order to ensure the programs' focus on poverty reduction through sustainable economic growth. Proposed Compacts also describe how the country plans to manage and implement its MCA program, including how it will ensure financial accountability, transparency, and fair and open procurement, as well as how it will measure results.

## About This Scorebook

The 2010 Country Performance Scorebook is the seventh publication of country performance data since the establishment of MCC. The Scorebook presents information on country performance on 17 independent and transparent indicators developed by third-parties that measure countries' demonstrated commitment to policies that promote political and economic freedom, investments in education and health care, control of corruption, and respect for civil liberties and the rule of law. These indicators inform the Board of Directors, MCC staff, Congress, and the Administration of candidate countries' broad policy framework for encouraging poverty reduction through economic growth. We hope this can also be a tool for citizens, civil society organizations, journalists, the private sector, and governments around the world to monitor performance and advocate for continued policy reform.

This year's Scorebook includes data on 98 countries (86 candidates and 12 countries that meet the income parameters for candidacy but are statutorily prohibited from receiving assistance), including countries that were eligible in previous years for Compact or Threshold assistance. A country is determined to be a candidate for MCA funding if its per capita income falls within predetermined parameters set by Congress and if it is not subject to certain restrictions on U.S. foreign assistance. For Fiscal Year 2010,

### What investments are being made?

Countries partnering with MCC engage in a consultation process with their citizens and the private sector to discuss how MCC funding can best be used to overcome barriers to poverty reduction and to stimulate economic growth. Many countries have identified improvements to roads and ports as vital to improving access to markets, schools, and health clinics for their people. Other countries have proposed building industrial parks, trade schools, small business centers, and making improvements to water and sanitation services. Land tenure and agriculture projects, micro-lending credit programs, and improvements to irrigation systems are also often identified as priorities to reduce rural poverty.

a country with a per capita income level equal to or less than \$1,855 is included in this Scorebook as a low income country (LIC). A country with a per capita income between \$1,856 and \$3,855 (inclusive) is considered to be a lower middle income country (LMIC).

In selecting Compact and Threshold eligible countries, MCC's Board evaluates: 1) candidate countries' performance on the policy indicators, 2) the opportunity for economic growth and poverty reduction, and 3) the availability of funds. To judge performance, the Board determines whether countries score above the median relative to their peers in the same income group on at least half of the indicators in the *Ruling Justly* and *Economic Freedom* categories, above the median on at least three of the five indicators in the *Investing in People* category, and above the median on the *Control of Corruption* indicator. One exception to this methodology is that the median is not used for the *Inflation* indicator. To pass the *Inflation* indicator a country's inflation rate must be under a fixed ceiling of 15 percent. The Board may also take into consideration whether a country performs substantially below the median on any indicator (i.e. in the bottom 25th percentile) and has not taken appropriate measures to address this shortcoming. While the indicator methodology is the predominant basis for determining which countries will be eligible for MCA assistance, the Board may also consider supplemental information and take into account factors such as time lags and gaps in the data used to determine indicator scores.

## Indicators—What They Measure

The 2010 Country Performance Scorebook measures performance on the policy criteria mandated in MCA's authorizing legislation. By using information collected from independent third-party sources, MCC's country selection process allows for an objective, comparable analysis across candidate countries. Data sources relied upon to produce this Scorebook are determined by the Board of Directors and are subject to change annually. Candidate countries regularly consult with the indicator institutions regarding their performance to identify opportunities for reform and to raise questions about the data.

As a rule, MCC relies on indicators that:

- ★ are developed by an independent third party;
- ★ use an analytically-rigorous methodology;

- ★ utilize objective and high quality data;
- ★ are publicly available;
- ★ have broad country coverage among MCC candidate countries and are comparable across countries;
- ★ have a clear theoretical or empirical link to economic growth and poverty reduction;
- ★ are policy-linked, i.e. measure factors that governments can influence within a two to three year horizon; and
- ★ have broad consistency in results from year to year.

The following indicators are measured by MCC in the three categories of *Ruling Justly*, *Investing in People*, and *Encouraging Economic Freedom*.

## *Ruling Justly*

Six indicators measure just and democratic governance, including a country's demonstrated commitment to promoting political pluralism, equality and the rule of law; respecting human and civil rights; protecting private property rights; encouraging transparency and accountability of government; and combating corruption.

- ★ **Civil Liberties**—A panel of independent experts rates countries on freedom of expression; association and organizational rights; rule of law and human rights; and personal autonomy and economic rights. *Source: Freedom House*
- ★ **Political Rights**—A panel of independent experts rates countries on the prevalence of free and fair elections of officials with real power; the ability of citizens to form political parties that may compete fairly in elections; freedom from domination by the military, foreign powers, totalitarian parties, religious hierarchies and economic oligarchies; and the political rights of minority groups. *Source: Freedom House*
- ★ **Voice and Accountability**—An index of surveys and expert assessments that rates countries on the ability of institutions to protect civil liberties; the extent to which citizens of a country are able to participate in the selection of governments; as well as freedom of expression, freedom of association, and media independence. *Source: World Bank Institute*

- ★ **Government Effectiveness**—An index of surveys and expert assessments that rates countries on the quality of public service provision; civil servants’ competency and independence from political pressures; and the government’s ability to plan and implement sound policies. *Source: World Bank Institute*
- ★ **Rule of Law**—An index of surveys and expert assessments that rates countries on the extent to which the public has confidence in and abides by the rules of society; the incidence of violent and non-violent crime; the effectiveness, independence, and predictability of the judiciary; and the enforceability of contracts. *Source: World Bank Institute*
- ★ **Control of Corruption**—An index of surveys and expert assessments that rates countries on the frequency of “additional payments to get things done;” the effects of corruption on the business environment; “grand corruption” in the political arena; and the tendency of elites to engage in “state capture.” *Source: World Bank Institute*

## *Investing in People*

Five indicators measure investments in the promotion of broad-based primary education, strengthened capacity to provide quality public health, the reduction of child mortality, and the sustainable management of natural resources.

- ★ **Public Expenditure on Health**—Total expenditures on health by the government at all levels divided by gross domestic product (GDP). *Source: World Health Organization*
- ★ **Immunization Rates**—The average of DPT<sub>3</sub> and measles immunization rates. *Source: World Health Organization*
- ★ **Public Expenditure on Primary Education**—Total expenditures on primary education by government at all levels divided by GDP. *Source: United Nations Educational, Scientific and Cultural Organization (UNESCO) Institute of Statistics and National Sources*
- ★ **Girls’ Primary Completion Rate**—The number of female students enrolled in the last grade of primary education minus repeaters divided by the population in the relevant age cohort (gross intake ratio in the last grade of primary). *Source: UNESCO Institute of Statistics*

- ★ **Natural Resource Management**—An index made up of four indicators: eco-region protection, access to improved water, access to improved sanitation, and child (ages 1-4) mortality. *Source: The Center for International Earth Science Information Network and the Yale Center for Environmental Law and Policy*

## *Encouraging Economic Freedom*

Six indicators measure the extent to which a government encourages economic freedom, including a demonstrated commitment to economic policies that: encourage individuals and firms to participate in global trade and international capital markets, promote private sector growth and the sustainable management of natural resources, and strengthen market forces in the economy.

- ★ **Inflation**—The most recent average annual change in consumer prices. *Source: The International Monetary Fund's (IMF) World Economic Outlook Database*
- ★ **Fiscal Policy**—The overall budget balance divided by GDP, averaged over a three-year period. The data for this measure rely primarily on IMF country reports with input from U.S. missions in host countries, or are provided directly by the government where IMF data are outdated or unavailable. All data are cross-checked with the IMF's World Economic Outlook database to try to ensure consistency across countries and made publicly available. *Source: IMF Country Reports, National Governments, and the IMF World Economic Outlook Database*
- ★ **Business Start-Up**— An index that rates countries on the time and cost of complying with all procedures officially required for an entrepreneur to start up and formally operate an industrial or commercial business. *Source: International Finance Corporation*
- ★ **Trade Policy**— A measure of a country's openness to international trade based on weighted average tariff rates and non-tariff barriers to trade. *Source: The Heritage Foundation's Index of Economic Freedom*
- ★ **Regulatory Quality**—An index of surveys and expert assessments that rates countries on the burden of regulations on business; price controls; the government's role in the economy; and foreign investment regulation, among other areas. *Source: World Bank Institute*
- ★ **Land Rights and Access**—An index that measures the time and cost of property registration in urban and peri-urban areas, and the extent to which the

institutional, legal, and market framework provides secure land tenure and equitable access to land in rural areas. *Source: International Fund for Agricultural Development and International Finance Corporation*

## Reading The Scores—A Reference Guide

Every year, each MCC candidate country receives a scorecard assessing performance in three policy categories: *Ruling Justly*; *Investing in People*; and *Encouraging Economic Freedom*.

For more information regarding the MCA Selection Process and these indicators, please visit MCC's website at [www.mcc.gov/selection](http://www.mcc.gov/selection).

How to Read this Scorecard: Each MCC Candidate Country receives an annual scorecard assessing its performance in 3 policy categories: Ruling Justly, Investing in People, and Economic Freedom. Under the name of each indicator is the country's score and percentile ranking in its income peer group (0% is worst; 50% is the median; 100% is best). Under each country's percentile ranking is the peer group median. Country performance is evaluated relative to the peer group median. Scores above the median, represented with green, meet the performance standard. Scores at or below the median, represented with red, do not meet the performance standard. The black line that runs along the horizontal axis represents the peer group median. Each World Bank Institute indicator is accompanied by a margin of error, which is represented by the vertical blue bar.

How to Read this Scorecard: Each MCC Candidate Country receives an annual scorecard assessing its performance in 3 policy categories: Ruling Justly, Investing in People, and Economic Freedom. Under the name of each indicator is the country's score and percentile ranking in its income peer group (0% is worst; 50% is the median; 100% is best). Under each country's percentile ranking is the peer group median. Country performance is evaluated relative to the peer group median. Scores above the median, represented with green, meet the performance standard. Scores at or below the median, represented with red, do not meet the performance standard. The black line that runs along the horizontal axis represents the peer group median. Each World Bank Institute indicator is accompanied by a margin of error, which is represented by the vertical blue bar.

## Economic Freedom

Sources: World Bank Institute, IFAD/IFC, IFC, Heritage Foundation, IMF WEO, IMF/National Sources

How to Read this Scorecard: Each MCC Candidate Country receives an annual scorecard assessing its performance in 3 policy categories: Ruling Justly, Investing in People, and Economic Freedom. Under the name of each indicator is the country's score and percentile ranking in its income peer group (0% is worst; 50% is the median; 100% is best). Under each country's percentile ranking is the peer group median. Country performance is evaluated relative to the peer group median. Scores above the median, represented with green, meet the performance standard. Scores at or below the median, represented with red, do not meet the performance standard. The black line that runs along the horizontal axis represents the peer group median. Each World Bank Institute indicator is accompanied by a margin of error, which is represented by the vertical blue bar.

# Vanuatu FY10

Population 231,142  
GNI/Cap: \$2,330 LMIC

## Ruling Justly
