Introduction to the Millennium Challenge Account

Established in 2004, the Millennium Challenge Account (MCA) is an innovative foreign assistance program designed to reduce poverty in developing countries through sustainable economic growth. As an independent U.S. Government agency, the Millennium Challenge Corporation (MCC) administers the MCA funds that are provided annually by Congress. MCC is managed by a Chief Executive Officer (CEO) with oversight from a Board of Directors. The Board is composed of five public sector members—the Secretary of State, Secretary of the Treasury, U.S. Trade Representative, Administrator of the U.S. Agency for International Development, and MCC's CEO—and four private sector members appointed by the President and confirmed by the U.S. Senate. MCC draws its diverse staff from various U.S. Government agencies, the private sector, universities, international development agencies, and non-governmental organizations.

Every year, the MCC Board of Directors meets to select countries as eligible for MCA assistance (see box describing MCC's assistance programs). Recognizing that development is achieved by a country's own efforts, policies, and people, MCC's assistance offers selected countries an opportunity to identify their own priorities for achieving sustainable economic growth and poverty reduction. Once selected as eligible, a country conducts an economic analysis and undertakes the process of developing a proposal for funding in broad consultation with its own citizens. MCC teams work in partnership with eligible countries to refine their compact proposals in order to ensure the programs' focus on poverty reduction through sustainable economic growth. Proposed compacts also describe how the country plans to manage and implement its MCA program, including how it will ensure financial accountability, transparency, and fair and open procurement, as well as how it will measure results.

About This Scorebook

The Fiscal Year 2025 Country Performance Scorebook is the twenty-second publication of country performance data since the establishment of MCC. The Scorebook presents information on country performance on independent and transparent indicators developed by third-parties that measure countries' demonstrated commitment to just and democratic governance, investments in the people of a country, and economic freedom. These indicators inform the Board of Directors, MCC staff, Congress, and the Administration of candidate countries' broad policy framework for encouraging poverty reduction through economic growth. We hope this can also be a tool for citizens, civil society organizations, journalists, the private sector, and governments around the world to monitor performance and advocate for continued policy reform.

This year's Scorebook includes data on 76 countries (62 candidates and 14 countries that meet the income parameters for candidacy but are statutorily prohibited from receiving assistance), including countries that were selected as eligible in previous years for compact or threshold program assistance. A country is determined to be a candidate for MCA funding if its per capita income falls within predetermined parameters set by Congress and if it is not subject to certain restrictions on U.S. foreign assistance.

For Fiscal Year 2025 (FY25), MCC is continuing to use the historical ceiling for eligibility as set by the World Bank's International Development Association (IDA) to divide the 76 countries into two income groups for the purpose of comparative analysis on the policy performance indicators. These two income

Compact & Threshold Countries

An MCC compact is a multi-year agreement between MCC and an eligible country to fund specific programs targeted at reducing poverty and stimulating economic growth. MCC has signed 49 compacts with 33 countries worth more than \$16 billion with Armenia, Belize, Benin, Burkina Faso, Cabo Verde, Côte d'Ivoire, El Salvador, Georgia, Ghana, Honduras, Indonesia, Jordan, Kosovo, Lesotho, Liberia, Madagascar, Malawi, Mali, Moldova, Mongolia, Morocco, Mozambique, Namibia, Nepal, Nicaragua, Niger, Philippines, Senegal, Sierra Leone, Tanzania, Timor-Leste, Vanuatu, and Zambia. MCC is currently developing compacts with Cabo Verde, The Gambia, and Togo, and concurrent compacts with Côte d'Ivoire and Senegal.

To provide a further incentive for policy reform, Congress also established the threshold program for countries that demonstrate a significant commitment to meeting the eligibility criteria but do not qualify for MCC compact assistance. Threshold assistance helps countries improve their policy environment to help build a strong foundation and to help them qualify for compact assistance. To date, MCC has signed threshold agreements totaling more than \$700 million with the following countries: Albania, Burkina Faso, Guatemala, Guyana, Honduras, Indonesia, Jordan, Kenya, Kiribati, Kosovo, Kyrgyz Republic, Liberia, Malawi, Moldova, Niger, Paraguay, Peru, Philippines, Rwanda, Saõ Tomé and Príncipe, Sierra Leone, Solomon Islands, Tanzania, The Gambia, Timor-Leste, Togo, Uganda, Ukraine, and Zambia. MCC is currently developing threshold programs with Mauritania, Philippines, and Tanzania.

groups include: 1) countries whose GNI per capita is less than or equal to \$2,165 in FY25 and 2) those countries whose GNI per capita falls between \$2,166 and \$4,515 in FY25.

In selecting compact and threshold eligible countries, MCC's Board evaluates: 1) candidate countries' performance on the policy indicators, 2) the opportunity for economic growth and poverty reduction, and 3) the availability of funds. If MCC has worked with a country on a previous threshold program or compact, MCC's Board also takes into consideration performance on the initial program.

To judge performance on the policy indicators, the Board will consider whether a country performs above the median or absolute threshold on at least half of the indicators, above the median on the *Control of Corruption* indicator, and above the absolute threshold on either the *Civil Liberties* or *Political Rights* indicators. Indicators with absolute thresholds in lieu of a median include a) *Inflation*, on which a country's inflation rate must be under a fixed ceiling of 15 percent; b) *Immunization Rates*, on which a country must have immunization coverage above 90% or the median, whichever is lower; c) *Political Rights*, on which countries must score above 17; and d) *Civil Liberties*, on which countries must score above 25. The Board will also take into consideration whether a country performs substantially worse in any category (*Ruling Justly, Investing in People*, or *Economic Freedom*) than they do on the overall scorecard. While the indicator methodology is the predominant basis for determining which countries can be considered as eligible for MCA assistance, the Board may also consider supplemental information and take into account factors such as time lags and gaps in the data used to determine indicator scores.

Indicators—What They Measure

The Fiscal Year 2025 Country Performance Scorebook measures countries' performance on the policy criteria mandated in MCC's authorizing legislation. By using information collected from independent

2

¹ All GNI per capita estimates in this Scorebook are from the World Bank's July 1, 2024 publication entitled "Gross National Income per Capita 2023" and utilize the Atlas method estimates.

third-party sources, MCC's country selection process allows for an objective, comparable analysis across candidate countries. Data sources relied upon to produce this Scorebook are determined by the Board of Directors and are subject to change annually. Candidate countries may regularly consult with the indicator institutions regarding their performance to identify opportunities for reform and to raise questions about the data.

As a rule, MCC relies on indicators that:

- ★ are developed by an independent third party;
- ★ use an analytically-rigorous methodology and objective, high quality data;
- ★ are publicly available;
- ★ have broad country coverage among MCC candidate countries;
- ★ are comparable across countries;
- ★ have a clear theoretical or empirical link to economic growth and poverty reduction;
- ★ are policy-linked, i.e. measure factors that governments can influence; and
- ★ have broad consistency in results from year to year.

The following indicators are measured by MCC in the three categories of *Ruling Justly, Investing in People*, and *Encouraging Economic Freedom*.

Ruling Justly

These indicators measure just and democratic governance, including a country's demonstrated commitment to promoting political pluralism, equality, and the rule of law; respecting human and civil rights; protecting private property rights; encouraging transparency and accountability of government; and combating corruption.

MCC Investments

Countries partnering with MCC undertake an economic analysis and engage in a consultation process with their citizens and the private sector to discuss how they can best use MCC funding to overcome barriers to poverty reduction and stimulate economic growth. Many countries have identified improvements to roads, ports, and railroads as vital to improving access to markets, schools, and health clinics for their people. Other countries have proposed building industrial parks, trade schools, and small business centers, and making improvements to water and sanitation services. For others. land tenure and agriculture projects, micro-lending credit programs, and improvements to irrigation systems are identified as priorities to reduce rural poverty.

- ★ Civil Liberties Independent experts rate countries on: freedom of expression; association and organizational rights; rule of law and human rights; and personal autonomy and economic rights, among other things. *Source: Freedom House*
- ★ Political Rights Independent experts rate countries on the prevalence of free and fair electoral processes; political pluralism and participation of all stakeholders; government accountability and transparency; freedom from domination by the military, foreign powers, totalitarian parties, religious hierarchies and economic oligarchies; and the political rights of minority groups, among other things. *Source: Freedom House*
- ★ Freedom of Information Measures the legal and practical steps taken by a government to enable or allow information to move freely through society; this includes measures of press freedom, national freedom of information laws, and the extent to which a country is shutting down the internet or social media. Source: Access Now / Centre for Law and Democracy / Reporters Without Borders

- ★ Government Effectiveness An index of surveys and expert assessments that rate countries on: the quality of public service provision; civil servants' competency and independence from political pressures; and the government's ability to plan and implement sound policies, among other things. Source: World Bank/Brookings Institution's Worldwide Governance Indicators
- ★ Rule of Law An index of surveys and expert assessments that rate countries on: the extent to which the public has confidence in and abides by the rules of society; the incidence and impact of violent and nonviolent crime; the effectiveness, independence, and predictability of the judiciary; the protection of property rights; and the enforceability of contracts, among other things. Source: World Bank/Brookings Institution's Worldwide Governance Indicators
- ★ Control of Corruption An index of surveys and expert assessments that rate countries on: "grand corruption" in the political arena; the frequency of petty corruption; the effects of corruption on the business environment; and the tendency of elites to engage in "state capture," among other things. Source: World Bank/Brookings Institution's Worldwide Governance Indicators

Investing in People

These indicators measure investments in the promotion of broad-based primary education, strengthened capacity to provide quality public health, the reduction of child mortality, and the sustainable management of natural resources.

- ★ Health Expenditures Total expenditures on health by government (excluding funding sourced from external donors) at all levels divided by gross domestic product (GDP). Source: The World Health Organization (WHO)
- ★ Immunization Rates The average of DPT3 and measles immunization coverage rates for the most recent year available. Source: WHO and the United Nations Children's Fund (UNICEF)
- ★ Education Expenditures Total expenditures on education by government at all levels divided by GDP. Source: The United Nations Educational, Scientific and Cultural Organization (UNESCO) Institute of Statistics and National Governments
- ★ Girls' Primary Education Completion Rate The number of female students enrolled in the last grade of primary education minus repeaters divided by the population in the relevant age cohort (gross intake ratio in the last grade of primary). Countries with a GNI/capita of \$2,165 or less are assessed on this indicator. Source: UNESCO Institute of Statistics and National Governments
- ★ Girls' Lower Secondary Education Completion Rate The number of female pupils that have completed the last grade of lower secondary education divided by the population within three to five years of the intended age of completion, expressed as a percentage of the total population of females in the same age group. Countries with a GNI/capita between \$2,166 and \$4,515 are assessed on this indicator instead of Girls' Primary Education Completion Rates. Source: UNESCO Institute of Statistics and National Governments
- ★ Natural Resource Protection Assesses the degree to which a country government is committed to the protection and sustainable management of natural resources. *Source: The Yale Center for Environmental Law and Policy*
- ★ Child Health An index made up of three indicators: access to improved water, access to improved sanitation, and child (ages 1-4) mortality. Source: *The Center for International Earth Science Information Network and the Yale Center for Environmental Law and Policy*

Encouraging Economic Freedom

These indicators measure the extent to which a government encourages economic freedom, including a demonstrated commitment to economic policies that: encourage individuals and firms to participate in global trade and international capital markets, promote private sector growth and the sustainable management of natural resources, and strengthen market forces in the economy.

- ★ Inflation The most recent average annual change in consumer prices. Source: The International Monetary Fund's (IMF) World Economic Outlook Database
- ★ Fiscal Policy General government net lending/borrowing as a percent of GDP, averaged over a three-year period. Net lending/borrowing is calculated as revenue minus total expenditure. *Source: The IMF's World Economic Outlook Database*
- ★ Employment Opportunity An index that rates countries based on their commitment to protecting worker's rights including laws against employment discrimination, protections for disability rights, the elimination of forced labor and the ability of civil society organizations to start-up and close freely. Source: Varieties of Democracy Institute and WORLD Policy Analysis Center (UCLA)
- ★ Trade Policy A measure of a country's openness to international trade based on weighted average tariff rates and non-tariff barriers to trade. *Source: The Heritage Foundation's Index of Economic Freedom*
- ★ Regulatory Quality An index of surveys and expert assessments that rate countries on: the burden of regulations on business; price controls; the government's role in the economy; and foreign investment regulation, among other areas. Source: World Bank/Brookings Institution's Worldwide Governance Indicators
- ★ Land Rights and Access An index that rates countries on the extent to which the institutional, legal, and market framework provides secure land tenure and equitable access to land in rural areas and the extent to which men and women have the right to private property in practice and in law. Source: The International Fund for Agricultural Development and Varieties of Democracy Index
- ★ Access to Credit An index that ranks countries based on access and use of formal and informal financial services as measured by the number of bank branches and ATMs per 100,000 adults and the share of adults that have an account at a traditional financial institution or money market provider. Source: Financial Development Index (International Monetary Fund) and Findex (World Bank)
- ★ Gender in the Economy An index that measures the extent to which laws provide men and women equal capacity to generate income or participate in the economy, including factors such as the capacity to access institutions, get a job, register a business, sign a contract, open a bank account, choose where to live, to travel freely, property rights protections, protections against domestic violence, and child marriage, among others. Source: Women, Business, and the Law (World Bank) and the WORLD Policy Analysis Center (UCLA)

Reading the Scores—A Reference Guide

Every year each MCC candidate country receives a scorecard assessing performance in three policy categories: *Ruling Justly, Investing in People*, and *Encouraging Economic Freedom*.
