

COMPACT GOAL

Using the results from the growth diagnostic developed under the Partnership for Growth (PFG) initiative, the Government of Tanzania (GOT) finalized concept notes in April 2014, focused on improving the technical and operational viability of the public power utilities; expanding access to modern electricity; and improving segments of the secondary road network to unleash the economic potential of key agricultural regions. Due diligence on the projects proposed in the concept notes led the MCC and GOT to narrow the program scope to focus on the power sector. The GOT and MCC signed a 609(g) agreement in November 2014 for \$9.78 million. These funds are currently being used to further study, design and develop the compact.

Eligibility Notification	
12-19-2012	MCC Board of Directors selected Tanzania as eligible to develop a second compact.
Constraints Analysis	
09-13-2011	Tanzania completed an economic constraints analysis in FY 2012 under the Partnership for Growth (PFG) initiative, which highlighted several constraints to growth including limited access to affordable, reliable electricity and limited market access in key agricultural regions, among other concerns.
Concept Note Received	
12-17-2013	In September 2013, the GOT submitted initial concept notes for projects to improve the technical and operational viability of the public power utilities, TANESCO and ZECO; expand access to modern electricity; and improve segments of the secondary road network that will help unleash the economic potential of key agricultural regions. These concept notes were further refined in a revised submission in December 2013 and finalized in April 2014.
Eligibility Notification	
12-10-2013	The MCC Board of Directors reselected Tanzania for eligibility in FY2014.
